## A Note from Our CEO

2024 has been an exciting and successful year so far for BroadFutures! Alongside expansion of our DC Internship Program with four new employer partners, we have also expanded our national program with new partners, Booz Allen Hamilton and Merck. We have extended our impact through workshops and neurodiversity training to various organizations and educational institutions. We have grown our team and welcomed new donors, all of whom are impacting expansion efforts and ensuring program accessibility. We look forward to continuing this momentum and hope to connect with you at our Fall Gala: Voices for Change, and other community events!
